CREATING ACCESSIBLE SERVICES AND SUPPORT:

# Community Engagement

For people to have opportunities to get involved in community activities.

We want people to be supported to engage in their local community and have a quality of life where loneliness is minimised.

To achieve this, we will work towards:

- Improving social connectedness and encouraging intergenerational positive relationships.
- Ensuring people feel valued, and listened to when accessing services, support and activities.
- Creating more accessible community activities for older people, and those with sensory loss, physical disabilities or mobility issues.
- Ensuring people have access to information and advice about services and opportunities.

## WHAT IS IMPORTANT TO PEOPLE?

People would like access to accessible support and activities.

They would like information to be accessible and up to date to support choice including clear accessible signage when you get somewhere. Services need to meet the needs of those who are not online.

## WHAT WE WILL DO TOGETHER:

- Scope available services and identify gaps.
- Co-produce solutions to meet identified needs.

## WHAT DIFFERENCE WILL THIS MAKE?

- People will feel more connected within their communities.
- Reduced loneliness and isolation.
- Increased take-up of activities and support among people who have accessibility needs, including physical disabilities and sensory impairments.

## “ PEOPLE SAID

It's not that hard to understand all we're asking for is a helping hand."
